STAFF REPORT

NO. FY 12-20

TO: BOARD OF DIRECTORS
FROM: CHRIS GALINDO, ADMINISTRATIVE BATTALION CHIEF
SUBJECT: APPEAL OF FIRE DISTRICT'S REQUIREMENTS FOR
TPM 21096 – TRAILSIDE ROAD
DATE: NOVEMBER 14, 2012

RECOMMENDATION

Staff recommends the Board of Directors uphold the decision of the Fire Chief and the District and deny the Appellants request for a variance of the District's "Dead-end roads" requirements and not grant any further continuances.

BACKGROUND

On May 25, 2012, Mr. Mahmoud Zarei ("Appellant") filed an appeal to the Board of Directors to reverse the Districts requirements for secondary access for his proposed subdivision (TPM 21096). The Appellant based his appeal on proposed mitigation options that he submitted in his final Fire Protection Plan (dated May 7, 2012) that was prepared by his original consultant, Mr. Lamont Landis.

On Wednesday, August 8, 2012, the Appellant and his legal counsel, Mr. Steven Sayler, appealed to the Board of Directors during their August Board meeting to consider his request for a variance as required in Fire Code Ordinance No. 2011-01. Fire Chief Tony Michel and staff recommended that the Board deny the request because the Appellant failed to provide secondary access options that were not beyond the current code. The Board agreed to continue the appeal for up to sixty days so that the Appellant could obtain the necessary claimed easement agreements for additional fuel modification zones as well as to present to staff other acceptable mitigating factors regarding the lack of secondary access.

On Wednesday, October 10, 2012, the Appellant requested that the Board grant him an additional thirty day continuance so that he could find a replacement for his current fire consultant, Mr. Landis, who could no longer provide his services due to health reasons. The Board agreed to continue the appeal another thirty days to allow the Appellant time to retain a replacement for his consultant. The Board at that time informed the Appellant that they would not grant any further extensions.

CURRENT SITUATION

On November 8, 2012, the Appellant's new consultant, Ms. Robin Church (RC Biological Engineering) submitted a revision to the project's original fire protection plan which included three (3) proposed mitigation measures that, in her opinion, would satisfy the District's "Dead-end roads" requirements. These new mitigation measures include (1) the installation of a 10 ft. x 30 ft. turn-out on Artesian Trail; (2) one additional hydrant near the proposed parcel; and (3) expanding the fuel modification zone to 50 feet on portions of Artesian Trails and Trailside Road.

On Friday, November 9, 2012, Staff reviewed the summary of proposed mitigation measures provided by the Appellant and his consultant. That same day, staff provided written correspondence to the Appellant reflecting the District's concerns and included the following comments:

- **Proposed mitigation measure No. 1: Installation of a 10 ft. x 30 ft. turn-out.**

Staff's Response: The proposal as submitted fails to provide any findings that would support the request and make it acceptable mitigation that can be considered by the District.

- **Proposed mitigation measure No. 2: Provide an additional fire hydrant near the driveway of the proposed parcel to increase access to water.**

Staff's Response: The proposed placement is a very short distance from an existing hydrant that the Appellant installed. The existing fire flow for this area currently meets or exceeds the District's water supply requirements. This provision will have no bearing on vehicular ingress / egress on the roadway, therefore the staff will not accept this as acceptable mitigation.

- **Proposed mitigation measure No. 3: Provide 50 feet of fuel management to the improved edge of Artesian Trail and Trailside Road where natural lands occur through a permanent easement.**

Staff's Response: During the August and October Board of Directors meeting, the Board requested that the Appellant submit (within a reasonable time frame) a proposal with all relevant easement agreements necessary for obtaining additional fuel clearances. No such easement agreements were included in his most recent submittal dated November 8, 2012.

The Board of Directors has granted the Appellant two extensions (totaling 90 days) that would allow him to develop and submit acceptable mitigation as well as obtaining the necessary easement agreements that would satisfy the District's "Dead-end road" requirements. The proposed mitigation measures as presented do not meet the same practical effect as secondary access.

TPM 21096 – Zarei Lot Split

The proposed project is TPM #21096 that will split a 4.9 acre lot into two parcels. The proposed parcel sizes are (lot 1) 2.28 acres gross and (lot 2) 2.63 acres gross. The proposed lots will be used for single family residence. The project is located at the end of Trail Side Road west of Artesian Trail, Rancho Santa Fe. The project encompasses flat land to steep sloped land covered with some dense brush. The site is covered with Non-Native Grasses, Coastal Sage Scrub, Southern Mixed Chaparral and urban developed land. The surrounding property is in a rural setting with some urban developed property mixed with areas of dense brush. Removal of the vegetation for this project will be a marked improvement; it will substantially reduce the fire hazard in the area. The nearest fire protection for this project is Rancho Santa Fe Fire Station 2 and is less than 5 minutes away.

Egress from the project will exceed the county threshold of 1,320 feet. Trail Side Road to Artesian Road is 2,112 feet which exceeds the requirement of 1,320 feet for roads more than 1 acre but less than 4.99 acres. Previously the project was proposing to provide secondary access however has been unable to obtain the easement. Existing improvements to Trailside which currently only provides access to one dwelling unit include 24 foot paved access and 20 feet of brush management adjacent to the improved edge of the road.

The following is a summary of the proposed mitigation measures to provide the same practical affect for the overlength dead-end road for this project:

- Widen Artesian Trail along the east side directly across from the 3 existing hydrants in a manner similar to the attachment. This would result in 10 feet of additional width for a length of 30 feet with a transition before and after for a length of 25 feet. This would result in an additional lane for passage if an Emergency Services Vehicle were staged adjacent to a hydrant.
- Provide an additional fire hydrant near the driveway of the proposed parcel. This would provide additional access to water above and beyond the minimum required hydrant density per zoning. Additionally the greatest amount of natural land is located to the south and west of the proposed project so this hydrant would significantly improve access to water where none is currently presently benefiting the community.
- Provide 50 feet of fuel management adjacent to the improved edge of Artesian Trail and Trailside where natural lands occur through a permanent easement. This will result in a fuel management zone of approximately 1.5 times the anticipated flame length as modeled in the previously prepared and approved Fire Protection Plan by Lamont Landis.

Re: Comments on revised Zarei Fire Protection Plan – TPM 21096, APN 267-148-16

Dear Mr. Zarei,

We have reviewed the latest revision to your project's Fire Protection Plan ("FPP") submitted by your consultant, Robin Church (RC Biological Engineering), to the Rancho Santa Fe Fire Protection District ("District") on November 8, 2012. The mitigation measures outlined in your latest proposal do not satisfy the District's Dead-End Road requirements.

The proposal submitted by Ms. Church provides for the addition of one (1) hydrant near the driveway. The proposed placement of this hydrant will be a very short distance from an existing hydrant that you've previously installed. Further, the existing fire flow for this area already meets or exceeds the District's current water supply requirements. This provision in your proposal will have no bearing on vehicular ingress/egress on that road way. As such it will not form the basis for an acceptable mitigation measure.

You are also requesting, as part of your proposal, that the District consider the installation of a 30 foot "turn-out" on Artesian Trail as acceptable mitigation; however your proposal as submitted fails to provide any required findings that would support the request and make it an acceptable mitigation measure that can be considered by the District.

In regards to your proposal for increasing the fuel management zones on portions of Artesian Trail and Trailside Roads, if you recall from the prior hearing, the Board of Directors had requested that you include in your proposal all relevant easement agreements necessary for obtaining these additional fuel clearances. No such easement agreements were included in this submittal.

The mitigation that you've presented in this plan fails to provide us a detailed solution to the District's "Dead-End Road Requirements" and your proposed mitigation measures do not meet the same practical effect as secondary access.

If you have any questions concerning the above comments, please contact Chief Michel (858) 756-6001 or you contact me directly at (858) 756-6010.

Sincerely,

RECOMMENDATION

After review of bid proposals submitted by various apparatus manufacturers, staff recommends rejecting all bids under the current fire apparatus bid process and to re-invite bids with revised specifications under a new Request for Proposal.

BACKGROUND

In FY 2010/11 staff was directed to begin the process for purchasing a new Type 1 fire apparatus. The Apparatus Committee was reconvened and tasked with the development of a detailed set of specifications and interpretive drawings. These specifications were then molded into a comprehensive bid packet. A Request for Proposal was formally put out to bid on September 10, 2012, and closed on October 19, 2012. Three (3) manufacturer's submitted bid proposals.

Upon evaluation of the bids, all proposals were determined to be non-responsive or non-compliant in one or more areas. Additionally, the usability of designs may not be the most advantageous to the District.

The rejection of bids under the RFP process was clearly identified in several areas:

- In Section 13.01, it stated, *"Though the District fully intends at this time to proceed through the RFP, the District is not under any obligation to award a contract, and reserves the right to terminate the RFP process at any time, reject any or all Proposals received and/or to withdraw from discussions with all or any of the Bidders who have responded."*
- Section 13.04, stated, *"The District at its sole discretion, reserves the right to terminate this RFP process and re-advertise with either the identical or revised specifications, if it is deemed to be in the best interest of the District to do so."*
- Lastly, the bid invitation clearly stated that *"The District reserves the right to reject any bids which do not conform to terms and conditions described in the specifications; to reject any or all bids and again invite bids; and waive informalities or irregularities in the bidding process."*
